

Respondus LockDown Browser and Respondus Monitor

Respondus LockDown Browser and Respondus Monitor are products which address the core issues of student identity and cheating, creating an essential layer of security for **non-proctored** assessments. Respondus Monitor is a companion product for Respondus LockDown Browser which integrates webcam technology with a locked down (unable to print, copy, go to another URL, or access other applications) browser. Students use their own computer and a webcam to record assessment sessions, all without leaving the Blackboard environment.

To activate Respondus LDB and Respondus Monitor for an exam:

Click **Course Tools** in the Control Panel

Select **Respondus LockDown Browser**

Click on the down arrow  next to the name of the test in which Respondus LockDown Browser will be activated.

- Require Respondus LockDown Browser for this exam

Password Settings

Password to access exam (optional)

Password to close browser and exit exam early (optional)

Monitor Webcam Settings

- Don't require Respondus Monitor for this exam
- Require Respondus Monitor for this exam
- Either Respondus Monitor or a proctored lab can be used to take this exam

When Respondus Monitor has been selected, the Startup Sequence appears.

Check the boxes next to the items you wish to appear to students before the exam begins. Once this is completed, click the **“Save and Close”** button.

Monitor Webcam Settings

- Don't require Respondus Monitor for this exam
- Require Respondus Monitor for this exam
- Either Respondus Monitor or a proctored lab can be used to take this exam

Startup Sequence

The Startup Sequence is the set of optional events that occur before a Monitor webcam session begins. You can choose the items to be included in the Startup Sequence, and can edit the text unless it has been locked by the administrator. Except for the Webcam Check which is always first, the order that items are shown in the startup sequence can be changed by dragging and dropping the items.
