Medical Coding
September 15-November 29
(Will not meet week of Thanksgiving)
Meets Tuesday & Thursday, 5:30-8:30

ICD 10 AND CPT

This is a two part course. The first part covers the Current Procedural Terminology (CPT) which is a listing of descriptive terms and identifying codes for reporting medical services and procedures. The purpose of CPT is to provide a uniform language that accurately describes medical, surgical, and diagnostic services. The second part of the course is an intensive workshop providing step-by-step education starting with the format and convention behind the International Classification of Diseases (ICD-9). Building upon these fundamentals, the student will be able to code complex diagnoses from the medical record documentation. The cost of the course includes instruction and textbooks.

Instructor:  V Cash

Cost:  $799.00 (payable before class begins)
